

Instructions to know the measure of the wrist

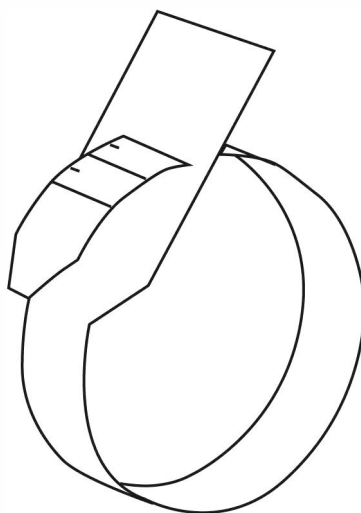

IMPORTANT.- To use this sheet, follow these steps:

- Before printing go to File Menu > Print > Page Scaling > None > OK
- After printing check with a ruler that the orange square on the left measure is 3x3cm exactly.
- If the square does not measure 3x3cm, the Wrist Sizer has been printed wrong. Reprint the sheet and ensure that Page Scaling is NONE.

¿How to use the Wrist Sizer?

Trim the following Wrist Sizer by the edge and cut the dotted line "cut here". Insert your hand through the Wrist Sizer and pull until you feel comfortable. The number in centimeters aligned with the edges is the size of your wrist.

You can also use a tape measure, tape or string. Wrap it around your wrist and measure the length with a ruler. Consider that the Original Version Wrist Sizer only represents an indicative guide and could not provide an exact size.
